Hot Springs

Termas Geométricas: This hot springs site is a beautifully designed work of architecture built with strong primitive geometric elements. One of the best in the area, but also one of the farthest, Geométrica is an hour drive from Pucón. It has 17 slate covered pools of natural hot springs that flow along a mountain stream in the midst of the native forest of the Villarrica National Park.

Termas Huife: The pools are on the banks of the plentiful Liucura River about a 40 minute drive from Pucón. There are 3 outdoor thermal swimming pools, each one with distinct temperatures. Huife is surrounded by 741 acres of grassland and native forest giving its guests access to many trails to walk through that will surely amaze you!

Termas Pozones: Also along the Liucura River, Pozones offers a different, more rustic atmosphere than the other hot springs. It is more often visited by a younger backpacker crowd and has a very relaxes atmosphere. There are 7 beautiful pools of various temperatures between 30C-42C with a few cabins for changing
