# FISHING

River and lake fording is by far the best way to enjoy the cast, enjoy fly fishing experience, and to get to know the area. While the area around Pucón generally offers trout of medium size, the ease of accessibility to the clean, fresh, and tranquil settings aids in making great memories for years to come. In addition, the rivers always have great visibility even after it rains.

**Off Limits** offers various excursions on the Liucura and Trancura Rivers designed for family groups and only fisherman.

### Drift Boats

The Liucura and Trancura Rivers are often surrounded by an abundance of vegetation which can make shore fishing difficult. For this reason the locals invented flat bottomed Cherry wood boats which are ideal for riding high in the water, navigating through occasional deep spots and maneuvering through quickly flowing currents.

### Fishing with Waders

In the cordillera there are places where the trout grow to a more impressive size and undoubtedly put up more of a fight. These mountain lakes are surrounded on all sides by towering volcanoes and Chile's distinct Araucaria trees.

### Catacraft

Experience the sensation of the river rapids as you search for the best and most inaccessible places to fish by Catacraft boats. Discover enchanting hidden spots located between thrilling rapids. The Catacraft sports comfortable, revolving seats which make maneuvering around the boat easy and is driven by expert guides who will present you with the best opportunity to snag even the most stalwart trout.

### Details

#### Drift Boats

\$25.000 per person  
half day 4 pax.
